

1.

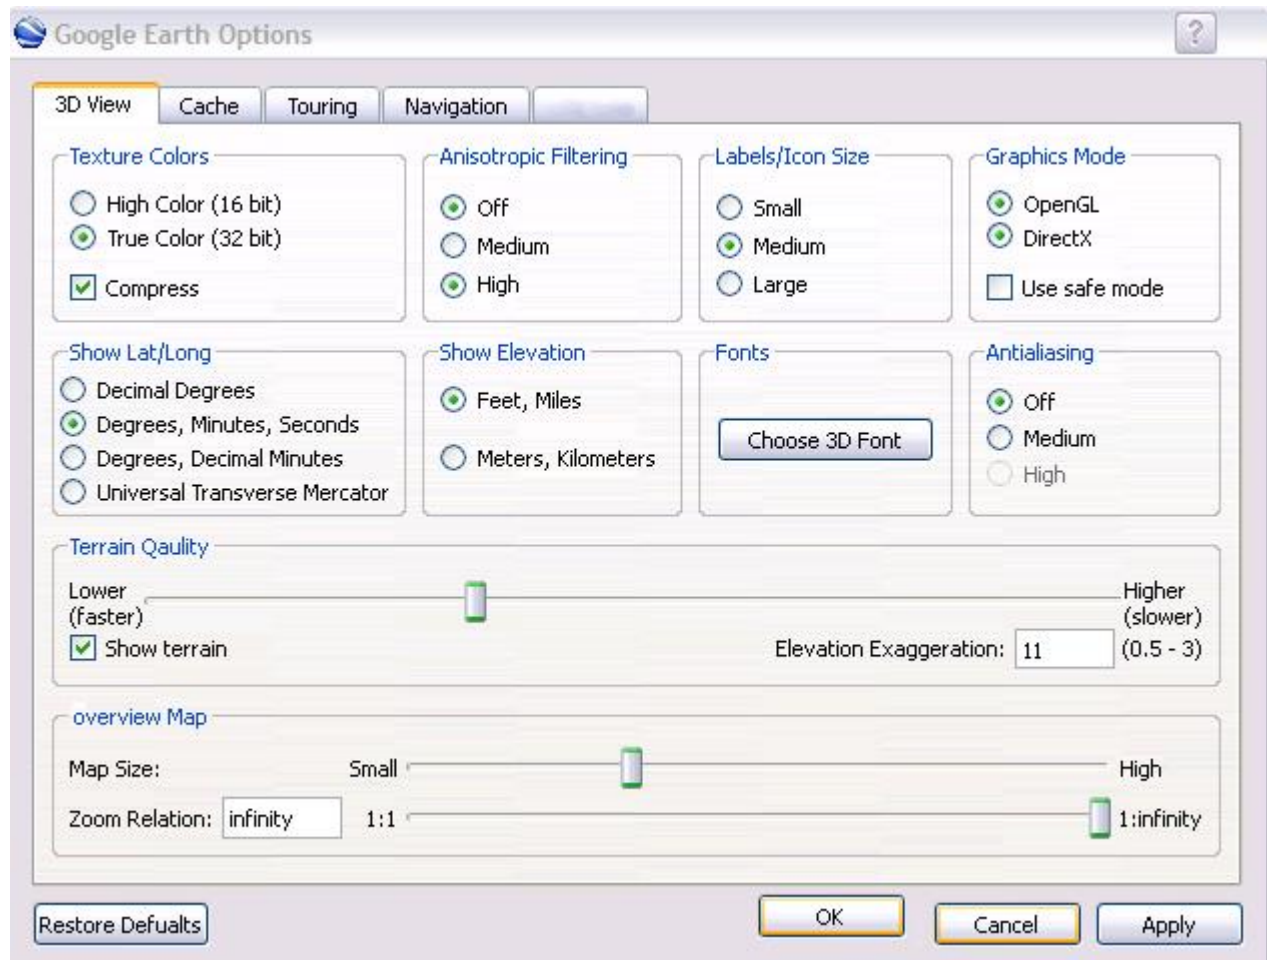

Purpose: Selecting settings for the folder view.

Bugs:

1. The **“Veiw”** tab -> **“View”**.
2. The “View” tab should be **center-aligned**.
3. **“Detials”** in the “Folder views” section -> **“Details”**.
4. The **radio button** in the "Files and Folders" of the “Advanced settings” section should be a **checkbox** instead.
5. Two checkboxes that contradict each other are **simultaneously selected** in the “Hidden files and folders” -> **only one can be selected**.
6. The **folder** “Hide empty drives” should be a **checkbox** instead.
7. The **“Restore Defaults”** button -> **“Restore Defaults”**

2.

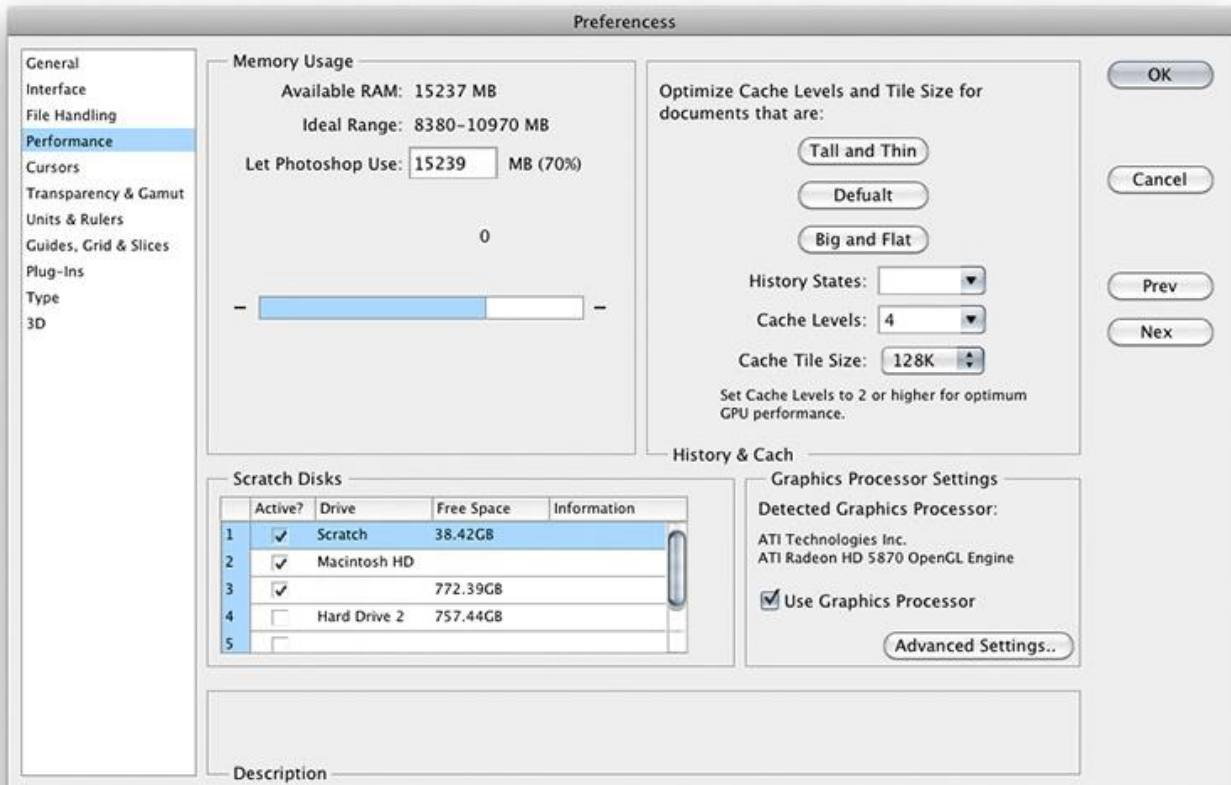

Purpose: Customizing 3d view in the Google Earth app.

Bugs:

1. **The close button** should be **in the top right corner** of the “Google Earth options” window.
2. **An empty tab** right after the “Navigation” tab **should be named**.
3. **Only one option should be chosen** in the “Anisotropic Filtering” section: “**Off**” or “**High**”.
4. **Only one option should be chosen** in the “Graphic mode” section: “**OpenGL**” or “**DirectX**”.
5. **The radio buttons in the “Show Elevation” section should be aligned** at the same distance as radio buttons in other sections.
6. **Checkbox “High” should be available** in the “Antialiasing” section.
7. The section name “Terrain **Qaulity**” -> “Terrain **Quality**”.
8. **0.5 – 3 are the only values that should be entered in the “Elevation Exaggeration” field** of the “Terrain Quality” section.
9. The “**overview Map**” section -> “**Overview Map**”.

10. “High” -> “Large” on the “Map size” slider.
11. The “Restore Defaults” button -> “Restore Defaults”.
12. The “Cancel” button should be aligned.

3.

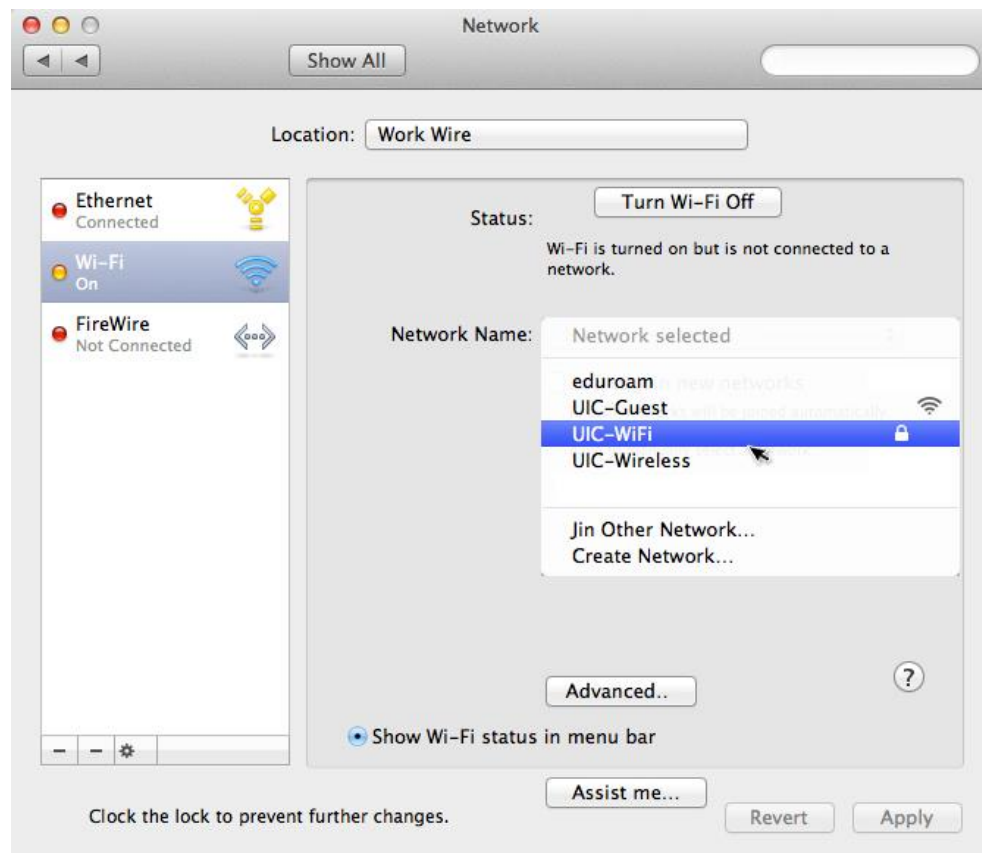

Purpose: Setting preferences in Photoshop

Bugs:

1. The window name “**Preferencess**” -> “**Preferences**”.
2. “Memory Usage” section:
 - a. The value in the “Let Photoshop Use:” field should be less than the available RAM size.
 - b. 15239 MB does not match 70% of RAM.
 - c. It is unclear what “0” and the progress bar belong to.
3. “History & Cache” section:
 - a. The name of the window should be at the top of its section.
 - b. “History & **Cach**” -> “History & **Cache**”.

- c. The “**Default**” button -> “**Default**”.
 - d. The “Cache Tile Size” should be a combo box, like “History States” and “Cache Levels”.
4. “Scratch Disk” section:
 - a. The column name “Active?” -> “Active”.
 - b. The 2nd and 3rd lines should be united: Macintosh HD 772.39GB.
 5. The “Description” name should be at the top of its section.
 6. The “Nex” button -> “Next”.

4.

Purpose: Internet settings window.

Bugs:

1. In the header, there are two arrow buttons with the same direction -> the right button should have a right-pointing arrow.
2. Next to the “Ethernet connected” there should be a green circle instead of a red one.

3. A setting button with a gear icon should be aligned.
4. The button "Turn Wi-Fi off" should be aligned.
5. The "?" button should be aligned.
6. "**Clock** the lock to prevent further changes" -> "**Click** the lock to prevent further changes"
7. The button "Assist me..." should be aligned.
